

# Intro to Hand Applique - Needleturn

## Supply List

In this class you will learn needleturn hand applique.

The samples will be done on 9 inch squares of fabric. If you wish, you can turn them into pot holders to put them to practical use. Instructions will be provided.

Options for motifs are attached.

### Items needed:

Sewing needles for basting - size 8 sharps or size 8 embroidery (larger eye), or any you have will work.

Applique Sharps, size 10

A thimble

Thin straight pins

Sharp scissors that will cut at their points. A smaller size is fine.

Seam ripper if you have one

Paper for note taking, pencil or pen.

### Fabric:

Please choose 100% cotton fabrics with a tight weave. Batiks are a good example of this, but any good quality fabric with a tight weave will work well.

1 fat quarter, or 1/4 yard background fabric, or a scrap at least 9 by 9 inches.

1 fat quarter, or 1/4 yard contrast fabric for the motifs, or a scrap at least 9 by 9 inches

Optional: scraps for the flower center, leaves or fish fins

### Thread:

For applique: thread to match your motif fabric. Choose a thread that is not too shiny. Cotton works well, but other matte fibers are fine too. Some manufacturers make a fine thread that is also a good choice.

For basting: any sewing thread - use up what you have.

### Optional pot holder finish: (Sewing machine required.)

1 fat quarter coordinating, contrasting or whatever you fancy fabric for the lining. Or you may use a scrap - 1 piece at least 9 by 9 inches.

Scraps of cotton batting - 3 pieces at least 9 by 9 inches each. If you have to purchase, get one package Craft size cotton batting, or 1/4 yard from a bolt.

You can also purchase heat resistant fabric on the web if you want a professional looking pot holder :)

Full size patterns for the motifs below will be available for you to trace and use.  
Choose any fabric you like - it does not need to be realistic.
